

## Science from the Start

### Measuring

Grass Seed Heads

Together with your child, you are using tools to measure how much soil, how many seeds, and how much water to add to your grass seed head!

You can continue to measure your seeds when you are home. Perhaps make a chart to record how tall it gets!

## TRY IT AT HOME!

Try comparing sizes of different items to introduce math vocabulary to your child.

Line up your shoes and organize them by size. Which one is smallest? Which is the largest? You can do this with similar items!

[WWW.SCIENCENTER.ORG](http://WWW.SCIENCENTER.ORG)
